Request for Information to Aid in the Implementation of the Recordation Requirements of Section 8 of the Fastener Quality Act

Agency: Patent and Trademark Office, Commerce

Action: Notice; Request for Information

Summary: The Patent and Trademark Office(PTO) is seeking information concerning alphanumeric designations currently in use by manufacturers or distributors of industrial fasteners. These alphanumeric designations may be used to signify the physical characteristics, strength, chemical content, size or other information about the fastener upon which they appear or they may be used as common law trademarks to identify and distinguish the manufacturer or distributor of such fasteners. The PTO needs information concerning these alphanumeric designations in order to administer the proposed fastener recordal system published on Aug. 17, 1992, at 57 F.R. 37060, 37061 to implement the requirements of Section 8 of the Fastener Quality Act, Public Law 101-592. Therefore, the PTO is requesting from fastener industry associations, standards bodies, or individual manufacturers or distributors, any general or specific information available concerning alphanumeric designations currently in use within the industry, whether as unregistered trademarks, as marks required by a standard, or for any other purpose.

Date: Comments should be submitted on or before Sept. 27,1993. Comments received after this date will be considered if possible.

Addresses: All comments concerning alphanumeric designations should be addressed to Lynne G. Beresford, Trademark Legal Administrator, Commissioner of Patents and Trademarks, Washington, D.C. 20231, telephone number (703) 305-9464.

For Further Information Contact: Lynne G. Beresford, Trademark Legal Administrator, (703) 305-9464.

Supplementary Information: In 1990, Congress enacted the Fastener Quality Act, Public Law 101-592 (the Act) to protect public safety, deter introduction of non-conforming fasteners into commerce, improve the tracing of fasteners used in critical applications, and provide customers with greater assurance that fasteners meet stated specifications. The Act requires that certain fasteners sold in commerce conform to the specifications to which they are represented to be manufactured; provides for accreditation of laboratories engaged in fastener testing; and requires the inspection, testing and certification (in accordance with standardized methods) of fasteners covered by the Act.

Section 8 of the Act prohibits offering fasteners for sale that are required by an applicable standard or specification to bear a raised or depressed insignia identifying the manufacturer or private label distributor unless such manufacturer or distributor has complied with the requirements of a program of the Secretary of Commerce for the recordation of such insignia in order to ensure that the fasteners can be traced to the manufacturer or distributor.

The program for recordation of fastener insignias, established by the Secretary of Commerce and administered by the Patent and Trademark Office, will allow the owner of a mark, which is the subject of a duly filed trademark application or registration, to apply for recordal of that mark as its fastener insignia. However, if the manufacturer or private label distributor does not wish to use a trademark as its fastener insignia, it will be permitted to apply for a unique alphanumeric designation for that purpose.

The PTO wants to ensure that it does not inadvertently issue an alphanumeric designation that is either already in use by a manufacturer or distributor as its identifying insignia, or a designation already in use by the industry to signify the physical characteristics, strength, chemical content, size or other information about the fastener. For that reason, the PTO is requesting from fastener industry associations, standards bodies, or individual manufacturers or distributors, any general or specific information available concerning alphanumeric designations currently in use within the industry, whether as unregistered trademarks, as marks required by a standard, or for any other purpose. The PTO does not need information concerning specific registered alphanumeric trademarks, as that information is readily available from the PTO's database.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

The following marks have registered on the Principal Register pursuant to the intent-to-use provisions of Section 1(d) of the Trademark Act of 1946, as amended.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
